

Commercial Refrigeration • Designer • Manufacturer • Importer

Huxford Refrigeration is an Australian owned commercial refrigeration company specialising in the design, manufacture and distribution of high-quality commercial fridges and commercial freezers. Established in 2012 we have over 30 years' experience in commercial refrigeration.

Products are uniquely designed in Australia for use in Australian conditions and are ideal for tropical climates such as the Oceania region. Experts in commercial refrigeration and offer market leading energy efficiency in refrigerated merchandisers and storage cabinets. Customers ranging from small shop owners through to large corporates enjoy lower energy consumption and lower unit running costs, without compromising cooling and pull-down performance.

About Us

Huxford Refrigeration is an Australian owned commercial refrigeration company specialising in the design, manufacture and distribution of high-quality commercial fridges and commercial freezers. Established in 2012 we have over 30 years' experience in commercial refrigeration. Our family history in beverages and refrigeration dates back to 1922 commencing with local supply of carbonated water and liquid concentrates, then progressed onto supply and manufacturing of coolers in Australia and overseas.

Our products are specifically designed in Australia for use in Australia and ideal for tropical climates such as the Oceania region. Our advanced manufacturing facility was built in 2009 and is ISO9001 accredited with ISO14001 quality and environment system certified and has also attained CCC, CE, SAA, TUV & C-TICK approval. We are experts in commercial refrigeration and offer market leading energy efficiency in our refrigerated merchandisers and storage cabinets.

With modern and stylish designs, clear and bright lighting, our cabinets help get the attention your product deserves by maximising its visibility and converting shopping browsers into buyers. Several product ranges feature room for custom graphics or decals and can include illuminated signage. Huxford exclusive ranges also support an easily removable "no tools required" refrigeration package that is interchangeable and could save customers down time (spoiled food) and costly mechanic/technician call-outs or long on-site diagnosis.

We proudly serve our customers in small business through to large corporate clients in power consumption from our lower unit running costs, without compromising cooling performance or quality.

In Australia we experience ever increasing electricity charges which is a significant financial burden to any business selling or storing perishable foods. Unfortunately, some businesses often find out that a cheap product option short term can easily cost tens of thousands of dollars in power usage long term.

The world we live in is changing with increasingly hotter temperatures, less rain and more people putting a strain on resources. Huxford takes climate change very seriously which is why we are constantly improving and evaluating our product offering to ensure they are market leading Eco-friendly, reducing our carbon foot print on the environment for a better future for all of us.

Besides the ability to own equipment outright with several finance options available, we also provide rental option solutions for customers looking to promote their brand awareness into the market through retail or chain distributors.

At Huxford Refrigeration we have the flexibility to custom manufacture innovative types of refrigerated plug in equipment to suit market needs. The team at Huxford monitors local and overseas industry, global trends and technology as well as regularly communicating with customers, suppliers and other manufacturers.

Corporate Rentals

If you want to promote brand awareness of your cold storage product in today's market one of the best ways to do it is by displaying and distributing your product through established department stores or outlets. Large fridge deployments don't need to have large capital expenditure to buy fridges or freezers outright when you can rent with Huxford Refrigeration.

We offer customers the option of renting stylish, modern and attractive commercial refrigerated display units with custom artwork or decals to get your product the attention it deserves.

Every customer is different and has different goals which is why we don't have "standard" contracts. We discuss your requirements in detail so we can work with you to negotiate the best option for your business situation. Every agreement is custom made.
